

Appl. No. : 10/6,327

Filed : August 1, 2003

CLAIM AMENDMENTS:**WE CLAIM:**

1. (Currently Amended) A wipe or cleaning pad, for cleaning glass and other glossy surfaces comprising:
 - a. a substrate and
 - b. a cleaning composition comprising:
 - i. less than 4% by weight total organic solvent; and
 - ii. greater than 0.05% by weight sodium hydroxide or potassium hydroxide; and
 - iii. having a pH greater than 10;
 - c. wherein said wipe or cleaning pad provides disinfectancy or sanitization; and
 - d. wherein said wipe or cleaning pad is not dependent upon quaternary ammonium compounds for disinfectancy or sanitization.
2. (Currently Amended) The wipe or cleaning pad of Claim 1 further comprising a Generally Recognized as Safe (GRAS) ingredient.
3. (Currently Amended) The wipe or cleaning pad of Claim 1 comprising less than 3% by weight total organic solvent.
4. (Currently Amended) The wipe or cleaning pad of Claim 3 further comprising a Generally Recognized as Safe (GRAS) ingredient.
5. (Currently Amended) The wipe or cleaning pad of Claim 1 comprising less than 2% by weight total organic solvent.
6. (Currently Amended) The wipe or cleaning pad of Claim 5 further comprising a Generally Recognized as Safe (GRAS) ingredient.
7. (Currently Amended) The wipe or cleaning pad of Claim 1 comprising less than 1% by weight total organic solvent.
8. (Currently Amended) The wipe or cleaning pad of Claim 7 further comprising a Generally Recognized as Safe (GRAS) ingredient.

Appl. No. : 10/e ,327

Filed : August 1, 2003

9. (Currently Amended) A wipe or cleaning pad, for cleaning glass and other glossy surfaces comprising:
- a substrate and
 - a cleaning composition comprising:
 - less than 4% by weight organic solvent having a vapor pressure less than 0.1 mm Hg (20° C); and
 - greater than 0.05% by weight sodium hydroxide or potassium hydroxide; and
 - having a pH greater than 10.
 - wherein said wipe or cleaning pad provides disinfectancy or sanitization; and
 - wherein said wipe or cleaning pad is not dependent upon quaternary ammonium compounds for disinfectancy or sanitization.
10. (Currently Amended) The wipe or cleaning pad of Claim 9 comprising less than 3% by weight organic solvent having a vapor pressure less than 0.1 mm Hg.
11. (Currently Amended) The wipe or cleaning pad of Claim 9 comprising less than 2% by weight organic solvent having a vapor pressure less than 0.1 mm Hg.
12. (Currently Amended) The wipe or cleaning pad of Claim 9 comprising less than 1% by weight organic solvent having a vapor pressure less than 0.1 mm Hg.
13. (Currently Amended) A wipe or cleaning pad, for cleaning glass and other glossy surfaces comprising:
- a substrate and
 - a cleaning composition comprising:
 - less than 4% by weight total organic solvent and
 - having a pH greater than about 10;
 - wherein said wipe or cleaning pad provides disinfectancy or sanitization; and
 - wherein said wipe or cleaning pad is not dependent upon quaternary ammonium compounds for disinfectancy or sanitization.
14. (Original) The wipe or cleaning pad of Claim 13 further comprising a hydrophilic polymer.

App. No.

: 10/4,327

Filed

: August 1, 2003

15. (Original) The wipe or cleaning pad of Claim 13 further comprising a hydrophilic nanoparticle.
16. (Original) The wipe or cleaning pad of Claim 13 having pH greater than about 11.
17. (Original) The wipe or cleaning pad of Claim 13 having pH greater than about 12.
18. (Currently Amended) The wipe or cleaning pad of Claim 13 comprising less than 3% by weight total organic solvent.
19. (Original) The wipe or cleaning pad of Claim 18 further comprising a hydrophilic polymer.
20. (Original) The wipe or cleaning pad of Claim 18 further comprising a hydrophilic nanoparticle.
21. (Currently Amended) The wipe or cleaning pad of Claim 13 comprising less than 2% by weight total organic solvent.
22. (Original) The wipe or cleaning pad of Claim 21 further comprising a hydrophilic polymer.
23. (Original) The wipe or cleaning pad of Claim 21 further comprising a hydrophilic nanoparticle.
24. (Currently Amended) The wipe or cleaning pad of Claim 13 comprising less than 1% by weight total organic solvent.
25. (Original) The wipe or cleaning pad of Claim 24 further comprising a hydrophilic polymer.
26. (Original) The wipe or cleaning pad of Claim 24 further comprising a hydrophilic nanoparticle.

Appl. No. : 10/L-327

Filed : August 1, 2003

27. (Currently Amended) A wipe or cleaning pad, for cleaning glass and other glossy surfaces and comprising:
- a. a substrate and
 - b. a cleaning composition comprising:
 - i. less than 4% by weight organic solvent having a vapor pressure less than 0.1 mm Hg and
 - ii. having a pH greater than about 10;
 - c. wherein said wipe or cleaning pad provides disinfectancy or sanitization; and
 - d. wherein said wipe or cleaning pad is not dependent upon quaternary ammonium compounds for disinfectancy or sanitization.
28. (Currently Amended) The wipe or cleaning pad of Claim 27 comprising less than 3% by weight organic solvent having a vapor pressure less than 0.1 mm Hg.
29. (Currently Amended) The wipe or cleaning pad of Claim 27 comprising less than 2% by weight organic solvent having a vapor pressure less than 0.1 mm Hg.
30. (Currently Amended) The wipe or cleaning pad of Claim 27 comprising less than 1% by weight organic solvent having a vapor pressure less than 0.1 mm Hg.
31. (Currently Amended) A method of disinfecting or sanitizing a glass or other glossy surface comprising wiping the surface with a wipe or cleaning pad comprising:
- a. a substrate and
 - b. a cleaning composition comprising:
 - i. having a pH greater than 10;
 - ii. less than 4% by weight total organic solvent and
 - iii. greater than 0.05% by weight sodium hydroxide or potassium hydroxide
 - c. wherein said wipe or cleaning pad provides disinfectancy or sanitization; and
 - d. wherein said wipe or cleaning pad is not dependent upon quaternary ammonium compounds for disinfectancy or sanitization.
